Outcome of the conference participation

Description of the outcome of the presentation of the accepted contribution, in terms of grantee's visibility, including the establishment of new contacts for future collaborations

(max. 500 word)

I presented my talk in a room with about 30 participants. Immediately after my talk, I answered two questions from the audience. In the coffee break following the talk, I engaged in discussions with other researchers (such as Felix Stutz, Max Plank Institute for Software Systems; and Limin Jia, Carnegie Mellon University) from which I received nice feedback. Finally, my colleagues and I had a lengthy and interesting discussion with Luís Caires (NOVA School of Science and Technology) which opened a path for a collaboration in the near future.

I believe that my participation in the conference was extremely fruitful. Besides presenting my own work, I was able to listen to many talks by many other researchers, some more related to my research interests than others. By meeting new people, I increased the visibility of my work and made future collaborations more likely. Besides that, I got valuable feedback that we shall try to incorporate in the journal version of our conference paper, as well as in future work.
